MOBILE APPLICATION

AI MENTOR CHAT BOT

ABSTRACT

The AI Mentor Chat Bot mobile application is designed to provide users with intelligent assistance, guidance, and communication through an AI-powered chatbot system. The application is developed with a modern UI/UX approach using Figma to create a simple, interactive, and visually attractive mobile interface. The main objective of the application is to offer a user-friendly platform where users can interact with an AI assistant smoothly and efficiently.

The application includes multiple screens such as splash screen, language selection page, welcome screen, login page, registration page, and chatbot interaction interface. The design mainly focuses on accessibility, usability, multilingual support, and easy navigation for all categories of users.

Soft color combinations, rounded UI components, proper spacing, and clean layouts are used to create a minimal and modern appearance. The application is suitable for educational guidance, mentoring support, and AI-based interaction systems. The chatbot interface allows users to ask questions and receive responses instantly, creating a smooth and engaging user experience.

INTRODUCTION

Artificial Intelligence has become one of the most important technologies in modern digital applications. AI-based chatbot systems are widely used in education, healthcare, customer support, and mentoring platforms to provide quick and intelligent responses to users. The AI Mentor Chat Bot application is designed as a mobile-based AI assistant that helps users communicate easily through a chatbot interface.

The application is developed with a strong focus on User Interface (UI) and User Experience (UX) principles. A well-designed UI/UX system improves user satisfaction, usability, and accessibility. Therefore, this application uses a clean and modern interface that allows users to navigate easily without confusion.

The mobile application includes onboarding screens, multilingual language selection, login and registration forms, and an AI chatbot communication interface. The design is created in Figma using Android and iPhone frame layouts to ensure responsive and visually balanced mobile screens.

The project mainly aims to provide:

- Better user interaction
- Easy accessibility
- Simple navigation
- Attractive visual design
- Smooth chatbot communication

The application is suitable for students, beginners, and general users who need AI-based guidance and support in an easy-to-use environment.

OBJECTIVES

- The main objectives of the AI Mentor Chat Bot application are: ○ To design a modern and attractive mobile application interface
- To create a user-friendly chatbot interaction system
- To provide multilingual support for different users
- To ensure smooth and simple navigation across screens
- To improve user engagement through clean UI design
- To develop responsive layouts for Android and iPhone devices
- To create an accessible and beginner-friendly application

PROBLEM STATEMENT

Many existing chatbot applications are difficult to use because of complicated interfaces, poor navigation systems, and lack of language accessibility. Users often face confusion while interacting with chatbot systems due to cluttered layouts and complex user flows.

Additionally, many applications only support a single language, making them difficult for regional users to access comfortably. There is a need for a simple and visually appealing chatbot application that supports multiple languages and provides smooth communication with AI systems.

The AI Mentor Chat Bot application solves these issues by providing:

- Clean and minimal interface
- Multilingual language options

- Easy login and registration process
- User-friendly chatbot interaction
- Better readability and navigation

SCOPE OF THE PROJECT

- The scope of the AI Mentor Chat Bot application includes:
- Mobile UI/UX design using Figma
- Android and iPhone responsive layouts
- AI chatbot interaction screens
- User onboarding and authentication screens
- Multilingual support system
- Simple and interactive user experience

Future improvements can include:

- Voice-based chatbot interaction
- Dark mode support
- AI personalization features
- Real-time language translation
- Cloud-based user data management

SOFTWARE REQUIREMENTS

Design Tool:

- Figma

Supporting Tools:

- Canva
- Google Fonts
- Android
- iOS (iPhone)

FIGMA LAYOUT DESIGN

Figma is a cloud-based UI/UX design tool used for creating wireframes, prototypes, and application interfaces. It helps designers create responsive mobile layouts with proper alignment, spacing, and interactive components.

IPHONE (iOS) LAYOUT DESIGN

The iPhone layout follows iOS Human Interface Guidelines to maintain consistency and smooth interaction.

iPhone Frame Sizes Used:

390 × 844 px

393 × 852 px iOS Design Features:

- Minimalistic layout
- Balanced spacing
- Clean typography
- Smooth visual hierarchy
- Modern UI appearance

APPLICATION MODULES

1. Splash Screen Module

The splash screen is the first screen displayed when the application launches. It contains the application logo and “Get Started” button.

Features:

- Application branding
- Attractive first impression
- Smooth navigation to next screen

2. Language Selection Module

This module allows users to choose their preferred language for using the application.

Languages Included:

- English
- Tamil
- Hindi
- Marathi
- Malayalam
- Telugu
- Gujarati

Advantages:

Improves accessibility

Supports regional users

Better user comfort

3. Welcome Screen Module

The welcome screen introduces the AI Mentor Chat Bot application and provides basic information about the platform.

Features:

- Introductory content
- Organization logos
- Continue button navigation

4. Login Module

The login module allows existing users to access the application securely.

Components:

- Username field
- Password field
- Login button
- Forgot password option
- Create account option

Benefits:

Secure user access

Simple authentication process

5. Registration Module

The registration module is designed for new users to create an account.

Registration Details:

Username

Password

Name, Role, Security question

Advantages:

Easy onboarding

User data collection

Personalized access

6. AI Chat Bot Module

The AI chatbot interface is the main functionality of the application where users interact with the AI assistant.

Features:

- User chat input
- AI-generated responses
- Clean chat interface
- Smooth conversation flow

Benefits:

Instant interaction

User engagement

Easy communication system

USER INTERFACE DESIGN

The application interface is designed with modern UI principles to ensure simplicity and usability.

UI Components Used:

Buttons

Text fields

Cards

Icons

Navigation controls

Chat containers

UI Principles Followed:

Consistency
Simplicity
Accessibility
Readability
Visual hierarchy

USER EXPERIENCE DESIGN

The UX design focuses on creating smooth interaction between users and the application.

UX Goals:

Reduce user confusion
Improve navigation
Increase engagement
Provide easy interaction

UX Features:

- Smooth user flow
- Clear screen transitions
- Minimal cognitive load
- Easy accessibility

COLOR PALETTE

The application uses soft pastel colors to create a calm and welcoming user experience.

Colors Used:

Light Cyan
Cream Beige
White

Purpose of Colors:

Creates modern appearance

Improves readability

Reduces visual stress

Enhances user comfort

TYPOGRAPHY

Readable and simple fonts are used throughout the application.

Typography Features:

- Clean font style
- Proper font size hierarchy
- Consistent text alignment
- Better readability

ADVANTAGES OF THE APPLICATION

- User-friendly interface
- Modern UI design
- Multilingual support
- Easy chatbot interaction
- Simple onboarding process
- Responsive mobile layout
- Attractive visual appearance

CHALLENGES FACED

- Maintaining consistency across screens
- Designing multilingual layouts
- Creating responsive mobile designs
- Balancing minimalism and functionality
- Managing spacing and alignment properly

FUTURE ENHANCEMENTS

The application can be improved in the future with advanced features such as:

Voice assistant integration

Dark mode support

AI personalization

Real-time translation

Cloud synchronization

Advanced chatbot intelligence

CONCLUSION

The AI Mentor Chat Bot mobile application successfully demonstrates a modern UI/UX design approach using Figma. The application provides a clean, attractive, and beginnerfriendly interface for AI-based interaction. Through multilingual support, responsive layouts, and smooth navigation, the application enhances user experience and accessibility.

The project shows how effective UI/UX design principles can improve usability, engagement, and interaction in modern mobile applications. The overall design provides a strong foundation for developing intelligent AI-based mobile platforms in the future.
